RE: Antibiotics and food supply

Dear Ms. Henney:

Please consider the long-term public health ramifications of the on-going misuse of antibiotics in our food supply, and do everything you can to ban this practice, particularly those antibiotics which are or could be used directly for human maladies. As the human population continues to grow and worldwide epidemics become more likely, the day approaches when we will need every weapon in our medical arsenal.

Thank you.

Sincerely,

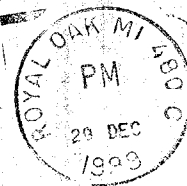

Barbara Ash
